Description

The Enkhuizen 570 is derived from an original English lifeboat. In the days when ships were still made of wood and men of steel, that original English sloop saved the lives of countless sailors. In the Netherlands, this type of sloop was widely used on coasters or ferry services at the beginning of the 20th century. Today, the 570 can also be found as a lifeboat on luxury motor yachts. A reliable and seaworthy design!

The 570 has the same eye-catching lines and pleasant sailing characteristics as the Enkhuizen 500. This makes the 570 very manoeuvrable, steady on course and extremely stable. After all, safety comes first.

The classic look, the spacious cockpit with comfortable round seat, the shallow draft and the perfect finish are a number of characteristics of the Enkhuizen 570. As standard, the sloop is finished with teak details in the interior.

The sloop is available with various diesel engines or with whisper-quiet electric motors. For the skipper who wants to combine the environmentally friendly electric motor with an unrivalled range, the 570 can also be equipped with a hybrid drive.

Like the other Enkhuizen sloops, the Enkhuizen 570 is also built entirely according to the wishes and personal taste of the customer. At the shipyard in Enkhuizen, we can show you that we go very far in this regard, so that we have been able to realize almost every wish of the customer so far.

An Enkhuizen sloop is therefore not just a sloop, but your sloop.
