Description

The Enkhuizen 580 Tender has a shallow draft, excellent manoeuvrability, a spacious and comfortable interior and sailing characteristics that belong to a modern design. In short, a compact boat with the comfort of the classic sloop.

The Enkhuizen 580 Tender is designed as a compact, but remarkably spacious tender.

Every detail has been carefully designed: from the powerful style bow and elegant sheer to the beautifully finished mirror with integrated swimming platform. High-quality materials, refined lines and a high-quality finish underline the luxurious character that is characteristic of Enkhuizenloops.

The hull shape of the new model invites sailing in a very wide range of sailing areas. Due to the shallow draft and the sophisticated way in which the hull releases the water, the boat attracts few waves in shallow water. A boat with respect for banks and other water sports enthusiasts. On larger waters, a high speed can be achieved, even with a low motorization, because the hull planes quickly. This allows a large distance to be covered in a short time and in complete comfort.

The 580 will be equipped with a robust and safe electrical system so that all modern tools can be reliably integrated. The boat offers enough space to make a long trip with 7 people. And of course the 580 can be equipped with all the amenities that make a trip a real pleasure.

Library images shown, boats built to order.
