## Description

The 615 is modelled on the fishing sloops that provided an income for thousands of families on the English East Coast. Spacious, stable sloops that were used for years to fish the coastal waters of the North Sea.

The Enkhuizen 615 owes its hull shape to these fishing sloops. Fishing tackle and bun have made way for a comfortable interior, finished with teak. And the old English engines have made way for modern, economical diesels or whisper-quiet electric motors in the 615. The beautiful shape and excellent sailing characteristics have remained.

The high backrest and leg height offer a pleasant stay, even on longer tours. The deep seat offers safety for young and old, even when the water gets a bit rougher.

The interior is stylishly finished with teak. The heavily insulated engine box is equipped with a teak panel with crank strips. Of course, the 615 can be equipped with numerous comfort-enhancing options, such as a toilet, a sundeck or a galley.

The Enkhuizen 615 comes standard with a hydraulic steering position. A tiller controlled version is also available on request.

The shallow draught in combination with the extremely small turning circle and the modest dimensions make this sloop ideally suited for day trips on lakes and rivers or on larger waters. After all, the DNA of the fishing sloop has been carefully cherished in the 615.

The sloop is available with various diesel engines or with whisper-quiet electric motors. For the skipper who wants to combine the environmentally friendly electric motor with an unparalleled range, the 615 can also be equipped with a hybrid drive.

Like the other Enkhuizen sloops, the Enkhuizen 615 is also built entirely according to the wishes and personal taste of the customer.

At the shipyard in Enkhuizen, we can show you that we go very far in this regard, so that we have been able to realize almost every wish of the customer so far.

An Enkhuizen sloop is therefore not just a sloop, but your sloop.
