Description

The in-house designer has designed an extremely spacious tender with an innovative interior. The characteristic features of the Enkhuizen tender have been fully retained in this new model. The sturdy style bow, the beautiful sheer and the extraordinarily stylish transom with integrated swimming platform and the high-quality finish with solid teak wood are characteristics of the Enkhuizenloep tender line that clearly manifest themselves in the Enkhuizen 744 Tender.

The hull shape of the 744 invites you to sail in a very wide range of sailing areas. Due to the shallow draft and the sophisticated way in which the hull releases the water, the boat attracts few waves in shallow water. A boat with respect for banks and other water sports enthusiasts. On larger waters, a high speed can be achieved, even with a low motorization, because the hull planes quickly. The integrated spray rails deflect the tubular water, so that the occupants stay dry even at high speeds. In short, a boat that can cover a large distance in a short time and in complete comfort.

The 744 will be equipped with a robust and safe electrical system so that all modern tools can be reliably integrated. The boat offers enough space to make a long trip with 8 people. And of course the 744 can be equipped with all the facilities that make a trip a real pleasure. There is room for the installation of a large refrigerator, a wine cooler, cooking facilities, washing facilities, wardrobe space and of course a toilet facility.

With the help of high-quality teak, they are invisibly integrated into the interior at first glance, which therefore remains spacious, uncluttered and safe. In the interior of the 744, we have raised the bar a little higher. The forecabin is directly accessible from the cockpit. It can be equipped with a permanent, lockable toilet facility, closet space for rainwear, for example, or as a traditional storage space. The access to the front is located behind the front seat.

As with every Enkhuizen sloop, special attention has been paid to a safe environment for the 744. Of course, all our boats meet the CE standard, but it doesn't stop there. Safety is not only determined by a design category. Safety is particularly important during the normal use of the boat. The 744 is equipped with a wide range of safety-enhancing standard features. For example, the fenders are attached to the boat via an ingenious click system. These snap-on deck eyes ensure that your fender always hangs at the right height, that no ropes dangle loose in the cockpit and that you attach it in no time.

A conveniently laid out interior with easily accessible storage space and concealed accessories ensures that no loose items have to be left lying around in the cockpit. The floor of the 744 is laid on two levels: the helmsman sits high, the passengers lower. In this way, the helmsman keeps an optimal overview of the sailing area even when the cockpit is full.

The Enkhuizen 744 has wide entry steps with good, sturdy support options. And because we build every Enkhuizen sloop for you by hand, we can install an extra boarding aid for you if desired. This makes not only sailing, but also getting in and out safer.

An Enkhuizen sloop is built to order for you personally and a personal approach ensures that we do not just build a boat, but build your boat.

Information & Features

2026 Yanmar (Engine 1)

Engine Type:	Inboard	Power:	29 hp
Fuel Type:	Diesel		
Drive Type:	Shaft Drive		

Dimensions

LOA:	24 ft 5 in	Max Draft:	1 ft 10 in
Beam:	8 ft 2 in		
Max Bridge Clearance:	3 ft 9 in		

Seating

Seating Capacity: **8**

Other

Designer: **Enkhuizenloep**

Builder: **Enkhuizenloep**

STANDARD EQUIPMENT

Dimensions

Length overall: 7.44 meters

Width: 2.50 meters

Draught: 0.55 meters

Draught height: approx. 1.15 meters

Weight: approx. 1700 kg

CE category: C

Maximum number of persons: 8

Propulsion

Standard version with YANMAR 29hp 3 cyl. Diesel Engine

80 Litre Fuel Tank with Fuel Shut-off Environmentally

Friendly, Water-Lubricated Propeller Shaft System

Water Separator and Coarse Filter

Equipment

Clinkered polyester hull

Continuous, spaciouly ballasted keel

Integrated swimming platform with stainless steel bumper all around

Polyester inner shell

Fully foamed, vibration-reducing engine foundation

Extra sound insulation in the engine box

Antifouling

Hydraulic steering system with polyester steering position

Double stainless steel exhaust incorporated in swimming platform

Stainless steel stern fittings with towing eye

Three large stainless steel bollards

Two stainless steel folding clamps foldable amidships

Two stainless steel bow clamps

Four stainless steel Snap-On deck eye

Maintenance-free start battery, incl. main switch

Instrument panel with start lock, rev/hour meter and indicator lights

Woodwork

Teak on the engine case

Solid teak gunwale

Comfort

Front and back comfortable round benches

Storage space, front, back and under the benches

Spray hood with stainless steel frame and zip-in back rug

Seat-back cushions, water resistant

Safety

Navigation lighting

Extinguishing opening with break glass

Lockable passage to the bathing platform

Electric bilge pump with float switch automatic

Robust stainless steel heel for extra protection of propeller and rudder

OPTIONAL EXTRAS

Propulsion

Standard version with VETUS 42hp 4 cyl. Diesel engine

Standard version with VETUS 52hp 4 cyl. Diesel engine

Standard version with YANMAR 80hp 4 cyl. Diesel engine

Standard version with YANMAR 110hp 4 cyl. diesel engine, fuel tank 110L

Standard version with Electric drive E-LINE 48V 7.5 KW large battery pack

Equipment

Luxury dashboard with separate gauges and switches

Solid stainless steel strip on gunwale

Steering wheel Teak 60cm instead of standard 50cm

Fuel gauge

Additional battery with separate charging system

Shore power connection with battery charger and cord

USB or 12 Volt connection per piece

Waterline

Woodwork

Solid teak floor with body wood

Solid teak on foredeck, aft deck and bathing platform

Solid teak table on foot

Solid teak armrest with stainless steel cup holder

Plastic table on foot

Synthetic teak floor with body wood

Plastic teak on front, aft deck and swimming platform

Plastic armrest with stainless steel cup holder
