Description

The Enkhuizen 922 Cruiser is the second model in our line of the Cabin. Together with our in-house designer, an extremely spacious Cabin has been designed with an innovative interior. The characteristic features of the Enkhuizen tender have been fully retained in this new model. The sturdy style bow, the beautiful sheer and the extraordinarily stylish transom with integrated swimming platform and the high-quality finish with solid teak wood are characteristics of Enkhuizensloep that also manifest themselves clearly in the Enkhuizen 922 Cruiser.

The hull shape of the 922 Cruiser invites you to sail in a very wide range of sailing areas. Due to the shallow draft and the sophisticated way in which the hull releases the water, the boat attracts few waves in shallow water. A boat with respect for banks and other water sports enthusiasts. On larger waters, a high speed can be achieved, even with a low motorization, because the hull planes quickly. The integrated spray rails deflect the tubular water, so that the occupants stay dry even at high speeds.

The 922 Cruiser is equipped with a robust and safe electrical system so that all modern aids can be reliably integrated. And of course the 922 Cruiser can be equipped with all the amenities that make a trip a real pleasure. The standard equipment includes a refrigerator, sleeping accommodation and toilet facilities. But much more is possible. There is enough space for installing an extra refrigerator, a wine cooler, cooking facilities, washing facilities, heating or other facilities.

Characteristic of the interior of an Enkhuizensloep is the way in which the facilities are concealed. With the help of high-quality teak, they are invisibly integrated into the interior at first glance, which therefore remains spacious, uncluttered and safe. In the interior of the 922 Cruiser, we have raised the bar a little higher. The Cabin is directly accessible from the cockpit. A hatch and four portholes provide sufficient light in the interior. The cabin door is completely sunk into the floor, so it never gets in the way. And of course, the interior of both the cabin and the cockpit can be largely adapted to your wishes. After all, we build every Enkhuizen sloop for its future owner. By hand, with love and entirely to your specifications.
